

## **New Pipe Organ S. F. Studios of N**

Installation of a new \$6000 organ is being completed in San Francisco studios of the National Broadcasting company. Specially designed for radio casting, the new organ will be for use within a few weeks and will be used at the inauguration of the remodelled "B" studio, which is nearing completion. The instrument is an exact replica of the organ used in the NBC studio in Chicago. It was built by the H. P.ert Morton Organ company in San Francisco. Complete orchestral accompaniment is provided by the various instruments which are united with the organ.
